SP∧RC

an unmatched tool
for growing your science

Customizable and scalable tech platform growing through open source collaboration

Access to world's first modular implant

IDE-approved tech currently in-human

Open source and available for re-use

Regulatory + educational resources

Enabling translational studies from benchtop → animal → human

coming soon

- Additional system modules facilitating assistive walking in paralysis, pain management, and brain-computer interface (BCI) control
- Benchtop evaluation kit
- Low-cost animal studies kit
- User-friendly SDK
